

Parent Partnership

As Early Years Professionals we pride ourselves on knowing that we have strong relationships with our parents. This in turn improves the learning outcomes for children, help's parents feel comfortable with leaving their child and make children feel secure and safe. Our open-door environment means we welcome parents into the setting when needed to talk to any of our team.

Parents are formally invited in to the nursery every 6 months to review their child's progress and spend time with their child's key person. Alongside these meetings parents are encouraged to participate in posts on Family and stay in contact with staff via the messaging app. Observations are added regularly and parents are encouraged to add their own from home.

Nursery events are regularly planned and advertised well. This encourages parents to attend the nursery and develop relationships with other parents and children. It also gives them an insight into the nursery and other members of the team. Parents are encouraged to support our chosen charities and fundraising events.

Each room has different ways of recording wow moments from home, these will be explained to the parents when your child starts at the nursery or transitions in between rooms. Artwork is shared regularly and sent home when requested.

Our parent's notice board has up to date information and displays our team pictures with their qualifications and achievements on.
