

Sustainability

At Bright Eyes we support children to learn about sustainable practices and foster respect and care for the living and non-living environment.

Children are able to develop positive attitudes and values about sustainable practices by exploring solutions to environmental issues, learning about the world around them and how to protect it and watching adults role model sustainable practices.

We promote a holistic, open-ended curriculum which explores ideas and practices for environmental sustainability and helps children understand the interdependence between people and the environment by:

Helping children to explore nature through art and play

Supporting children to experience the natural environment through natural materials like wood, stone, sand and recycled materials

Supporting the environment by learning how to grow and nurture plants in the nursery garden and discovering all about the food cycle by growing, harvesting and cooking food for our nursery menu

Helping children to learn about water conservation, energy efficiency and waste reduction through play-based activities and adult interactions

Going on nature walks and learning about plants they see in the local area

Encouraging parents and children to regularly walk to nursery to raise the awareness of caring for the planet

Developing a recycling area and encouraging children to share a recycling ethos in the home environment.

As a nursery we will embed sustainability into all aspects of the operations including:

Recycling materials for art and creative activities and encouraging parents to bring in their recycling materials for the same use

Ensuring parents recycle children's take-home recycled material models, if they do not keep them

Considering our carbon footprint when purchasing materials

Shopping local where possible

Turning off equipment and lights when not in use

Using energy saving light bulbs

Not leaving any equipment on standby

Unplugging all equipment at the end of its use/the day

Using energy saving wash cycles on the washing machine

Hanging washing out to dry and/or using clothes horses rather than tumble dryers where possible

Composting food waste

Incorporating water-wise strategies such as ensuring taps are turned off and leaks fixed

Using potable water rainwater butts for outdoor water play

Recycling water from the water play to water plants outside

Using food that we have grown in nursery meals.

Working together with all our parents and partners will help our environment to be more sustainable and make it a better place for our future generations to grow up in.

We assess our nursery's impact on the environment on a regular basis and put procedures in place to counteract this impact.

In order to encourage children not to waste food or to play with food at mealtimes, we discourage the use of food as a play material; instead, we encourage activities which involve preparing and tasting different types of food.

This policy is reviewed annually and is carefully considered in the best interests of the children, nursery and the environment.

Policy Created 19th August 2025
